

## PseudoCityCode Loader™

### *The complete solution for negotiated rate viewership management*

PseudoCityCode (PCC) Loader automates the process of publishing viewership authorization for negotiated hotel rates in the major GDSs. As an integrated publishing solution in the PropertyVault suite, PseudoCityCode Loader completes the negotiated rate loading process.

*Easily publish viewership authorization*

### **Maximize Bookings**

Maximize bookings to your hotels by ensuring that all authorized agencies and consortia have the correct access to their negotiated rates in the GDSs. Enable rate and reservations staff to spend time analyzing rates instead of doing manual data entry. PseudoCityCode Loader is a web based solution and stores the Pseudo City Codes for review and reuse for following years' updates. As a hosted ASP application PseudoCityCode Loader reduces the implementation time and cost associated with GDS connectivity.

- Multiple GDSs at once
- Intuitive design
- Store codes online
- Submit to publish

**Rate Viewerships - Acme** [Help...](#)

[Return to Viewerships list](#)  
**Note:** Enter multiple codes in a comma separated list. GDSs left empty can not be published.

Publish	GDS	Reference Codes (maximum of 3000 characters)
